CATALOG DESCRIPTION:

This course is designed to provide an overview of family business, including what is required for family harmony and business continuity.

STUDENT LEARNING OUTCOMES:

This course is an upper level elective designed for students interested in pursuing a career in a family business environment. Upon completion of the course, the student should be able to:

1. Identify the social and economic impact of family business.
2. Explain family business dynamics in terms of three elements – the individual, the family, and the business.
3. Apply the specific practices and skills of effective family businesses.
4. Integrate entrepreneurial and professional management concepts for strengthening family business organizational performance.

COURSE OBJECTIVES:

This course explores the challenges and opportunities facing individuals and families involved in family business relationships. The course uses a systems model of the family and business to demonstrate the interrelationships and connections among the key stakeholders.

Some of the specific topics include the family system, culture, entrepreneurial influences, conflict and negotiation, career planning, ethics, governance, succession and strategic planning, professional support relationships, and survival skills as a son or daughter in a family business.

Students are encouraged to invite a parent or other significant relatives from their family business to attend and participate in the course. University experience has demonstrated that families participating in this course report improved family learning and development.
This course is designed to provide an overview of the planning and management process required for family harmony and business continuity. The course is structured as a seminar on family business success factors. Each student group will select a family business and complete four exercises exploring their own selected family business situation. The first exercise will provide an overview of the family history and culture with three additional exercises addressing family participation, leadership development, and strategic planning. These exercises represent a foundation for the development of a comprehensive planning process for a family business.

The learning activities include lectures, assessments, exercises, guest speakers, family projects, videos, case and class discussion, text readings and outside reading assignments. The study of family business is a multidisciplinary academic topic and consequently, guest speakers will be used to provide the most current information and professional experience. Each class session is designed to provide theory or background information and an opportunity for application in the form of cases, guest speakers, or student activities. The diagram below represents a family business planning model that is demonstrated in the family projects completed throughout the course. It is found on page 12 of the text (handout), Strategic planning for the family business by Carlock & Ward. (BB)

**Students are responsible for downloading copies of course materials placed on Blackboard (BB)—and bringing to class.**

**SECTION 1 – PDF Handout (BB).**

**COURSE VALUES:**

I believe strongly in the importance of family business. I recognize the unique challenges that families-in-business face and I strive to create a family business learning community where we all learn from each other. The classroom must be a safe environment where individuals can take risks and test new ideas, such as:

- Family enterprise is an exciting opportunity that offers our students significant rewards, but not everyone should pursue a family business career.
- The dynamics and interaction of family and business systems require a multidisciplinary approach to management and planning that can be taught.
- A healthy family supports a successful business - a successful business doesn't always create a positive family situation.
- Balancing work and love are determinants of a successful human life.
- Ethical values are important to all family enterprises.

**CLASS PARTICIPATION:**
By providing an environment of mutuality, I hope we can have an enjoyable learning experience together. I believe all students and family members have a wealth of resources to add to the class, and intend to draw on this resource for the benefit of the whole. It is of vital importance to your own as well as your classmates learning that you ask questions reveal facts, and challenge presented material. Each student should come prepared to discuss and contribute ideas on the readings or case included in that day's topics. I hope that each of you will be eager to enter into the discussion. Let's find out what chat synergy is all about, learn, grow and develop!

EVALUATION:

All exams will be non-cumulative. They will consist of True-False and Multiple Choice questions. Material not in your textbook that is covered in the lectures will be included in the exams. This may vary somewhat by exam. This includes, but is not limited to, information given by articles, films, cases, handouts, guest speakers and any material discussed during class lecture.

Total Points = 549

GRADING:

All points will be added at the end of the quarter to get your total point score. This is the fairest way for students because it gives you the advantage of being able to “bump-up” your total points from one test to the next instead of getting a blanket grade point for each exam that you don’t have the chance to improve.

After all points are totaled, the total points are ranked from the highest point total to the lowest point total. Two columns are made. One is a percentage column and the other is a curve column. The percentage columns are figured as:

<table>
<thead>
<tr>
<th>Your total points</th>
<th>Total points possible</th>
</tr>
</thead>
</table>

4
The following percentages are used to help you determine your approximate class standing at any time:

<table>
<thead>
<tr>

<td>98% - 100%</td>

</table>

The curve column takes the highest point total in the class as a 4.0 and works down from there. These percentage and curve columns are then compared to arrive at the fairest grades for the class. Each type of grading has its advantages, and this way we use the best of both systems. During the quarter it is best to figure how you are doing based on the percentage column, knowing that you will do at least that well, but probably better when both systems are figured at the end of the quarter. Please feel free to see me concerning your grade at any time.

PRESENTATION SUMMARIES AND REFLECTIONS:

YOU MUST FIND A FAMILY BUSINESS OR HAVE A FAMILY BUSINESS IN YOUR FAMILY AGREE DO THE EXERCISES. THIS IS YOUR RESPONSIBILITY.

The purpose of this assignment is to provide you with an opportunity to apply concepts from class to real world situations. This paper must include a thorough summary of all points of the presentation followed by your personal reflections on your family business and how the presentation's family business has similarities, differences, advantages, and disadvantages to your own.

EVALUATION CRITERIA FOR EXERCISES A, B, C, D:

1. Concise information presented in an understandable and persuasive style (5 points).
2. Thoroughness (includes information from readings and class activities) (5 points).
3. Well thought out ideas to reflect your personal understanding of your family business situation (5 points).
4. Demonstrated participation and involvement of other family members, employees, or professional consultants that work with your family business (5 points).
5. Inclusion of concepts or ideas from the exercise worksheet (5 points).

WRITTEN ASSIGNMENTS:

Papers should be typed, double-spaced with one-inch margins all around in Microsoft Word. Written assignments should not exceed the guidelines set. Always remember to add a cover page and header to all of your papers that contain your name, the class title and number (ENT/BUS 337 Family Business), name of the assignment and the date the assignment is due. Post your assignment on blackboard under assignments.

DESCRIPTION OF ASSIGNMENTS:

The exercise worksheets are a guideline and data gathering tools for exploration and thinking about your family and business situation. Each student should review the exercise worksheet with your family and write a response to the summary questions in 12 point font by numbering the questions (do not write out the questions) and answering the questions on the exercise. Discuss the information with your family and identify the key influences that will impact on your
business and family decisions. Your paper for each exercise should identify and analyze
concerns, opportunities and challenges the family business presents to you and your career.

**Exercise A:**
**Family Business History and Culture**

This exercise is the first step in developing an understanding of your family business. Knowing
the family business history, values and culture is an important foundation for analyzing the
situation from both a family and a business perspective. The goal of this project is to understand
the influences and experiences that shape your family's personal and business relationships and
values. At the end of the exercise, write a 2 page reflective paper (double-spaced 12 inch font in
Times Roman) on the lessons learned from the exercise and the topics you and your family would
like to pursue further. Attach this reflective paper to the exercise itself and turn both in during
class on the due date.

**Exercise B:**
**Family Participation**

The family needs to make a transition from parent-child relationships to a family of adults. This
transition requires the family to examine its core values, communications patterns and structure.
This exercise helps the adult family develop new behaviors and ideas for decision making,
problem solving and leadership. The family participation plan clarifies the family's business and
personal relationships. At the end of the exercise, write a 2 page reflective paper (double-spaced
12 inch font Times Roman) on the lessons learned from the exercise and the topics you and your
family would like to pursue further. Attach this reflective paper to the exercise itself and turn both in during
class on the due date.

**Exercise C:**
**Management Development**

The management development plan represents an opportunity to negotiate your potential entry
and participation into the family business. This exercise identifies several important topics
related to family business participation. The outline for Exercise C is a guide, but there may be
other issues specific to your family or a business that should be considered. The nature of this
assignment requires interaction between the student and senior management of the family firm.
The assignment should demonstrate input from the current family management and represent a
discussion of your possible participation in the firm. At the end of the exercise, write a 2 page
reflective paper (double-spaced 12 inch font Times Roman) on the lessons learned from the
exercise and the topics you and your family would like to pursue further. Attach this reflective
paper to the exercise itself and turn both in during class on the due date.

**Exercise D:**
**Strategic Business Plan**

The strategic plan represents the family, owners and management’s attempt to create a shared
future vision. The plan articulates the tactics and actions that will help the firm successfully
compete in the marketplace. This exercise brings together the family and business systems and
explores missions, goals, assessing the environment and the firm, and developing action plans.
This exercise demonstrates the interdependence and interrelationships of family business plans. At the end of the exercise, write a 2 page reflective paper (double-spaced 12 inch font Times Roman) on the lessons learned from the exercise and the topics you and your family would like to pursue further. Attach this reflective paper to the exercise itself and turn both in during class on the due date.

Final Summary Reflective Paper (4 pages)

This final paper (double-spaced 12 inch font Times Roman) and its attendant presentation are designed to help you integrate the blocks of knowledge from the course with a systemic view of your family business. Students will learn new information and develop personal insights by completing the exercises throughout the course. The paper should conclude with a summary of your SWOT (strengths, weaknesses, opportunities, and threats) analysis of your business; the direction you believe it should take in the next five years; what it needs to successfully reach its goals for that period; and your own decisions; actions (even if preliminary) related to your family business career; and what you liked best about this class and what you might do to improve it for others. Each student or team will have one hour to present the highlights of their paper to the class in whatever way they deem most effective (lecture, handouts, overheads, etc.). However, the presentation must include a PowerPoint presentation with the other means of presentation. It is a requirement that everyone in the class must present.

The final grade for this course will reflect the quality of your learning experience based on your application of the course concepts to your family situation. Each family exercise will be discussed in class and your work returned with comments so you can make revisions and have that work product to assist you with your final summary paper. Papers that do NOT reflect A or B work or miss critical concepts will be returned for rewriting. Your reflective papers should represent a portion of the "portfolio" of your family.
