

**MBA 703: ECONOMIC POLICIES AND IMPACT ON GLOBAL OUTCOMES
SPRING 2018**

Amelia Hopkins (ashopkin@uncg.edu)
465 Bryan Building – Economics Department

Phone 334-5463 Economics Department
Office Hours: 2:00 – 3:00 p.m. on
Tuesday & Thursday
Or by appointment

CATALOG DESCRIPTION

Economic analysis of markets and government intervention that addresses the sustainability of fiscal, monetary and exchange rate policy and their short- and long-run impact on the global environment.

TEXTBOOK

Bade and Parkin, Foundations of Macroeconomics, 7th edition, ISBN 978-0-13-346062-9

PURPOSE

The course will develop your analytical ability (1) to understand the connective linkages of among macroeconomic markets, (2) to analyze the current macroeconomic environment and (3) to assess the effectiveness and sustainability of macroeconomic policies (e.g. fiscal, monetary, and exchange rate).

The course will utilize aggregated markets such as the output, labor, credit/loanable funds, reserve, money and foreign exchange markets to analyze the effect of changes in monetary, fiscal and exchange policy in the context of the domestic and global economy. The lectures, discussions, readings and assignments will help to develop your ability to analyze the current economic environment, evaluate current government policies, and assess the risk facing businesses and households. Historical case studies will be employed as an important teaching tool to explain the current global economic environment.

SOURCES OF ECONOMIC DATA and ANALYSIS

See government agencies such as CBO.gov, BEA.gov, Federalreserve.gov, BLS.gov and other sources such as The Tax Foundation. For domestic and international data go to the St. Louis Federal Reserve Bank (FRED) database and for international data go to the United Nations Human Development Report 2011, <http://hdr.undp.org>. For unique social, political, and analysis related to growth and development go to TED Talks and listen to various presentations “Talks” by Hans Rosling.

FACULTY STUDENT GUIDELINES

CONTENT/UPLOADS/2017/08/FACULTY_STUDENT_GUIDELINES.PDF](https://bryan.uncg.edu/wp-content/uploads/2017/08/faculty_student_guidelines.pdf)

ATTENDANCE

Attendance and class participation is expected. If you miss class, you are responsible for the class material. You may record the class. There is no class March 6-7 because of spring break.

BAD WEATHER POLICY

The cancellation of class due to weather or other event may be made up by extending class time or having a make-up class period. If a test is cancelled, then be prepared to take the test the very next class period.

ACADEMIC HONOR CODE

Students are responsible for being familiar with the UNCG policy on cheating, plagiarism, misuse of academic resources, falsification and facilitation of dishonest conduct. Procedures and penalties related to these and other policy violations are found at: <http://www.uncg.edu/handbook/academic-integrity-policy/>. Any violation of the Honor Policy may result in a failure for the assignment and subsequently the course. **Reminder: Copying and pasting from a website without footnoting the source is plagiarism.**

LEARNING OBJECTIVES FOR MBA 703

Students should be able:

1. To use the tools of supply and demand to analyze shifts in the aggregate macro markets.
2. To use the tools of supply and demand to provide analysis of intended and unintended outcomes from government intervention in the market place.
3. To discuss the macroeconomic environment with regard to nominal and real GDP, nominal and real interest rates, economic growth rates, price indexes, deflation and inflation; unemployment and employment; the federal budget deficit and the national debt; the current and capital accounts and its status as a debtor or creditor nation.
4. To analyze labor market issues with regard to employment and unemployment.
5. To identify the sources of economic growth for developed and developing countries with regard to public policy (savings, investment and taxation) that could increase the rate of potential (long-term) real GDP growth.
6. To analyze the effect of short-run fluctuations in the growth rate of real GDP and prices from supply (demand) shocks and to recommend appropriate policy changes.
7. To describe how exchange rates changes correct trade disequilibrium and why financial flows can disrupt the equilibration mechanism and cause trade imbalances to worsen.
8. To analyze the effect of changes in expansionary and contractionary monetary policy on economic activity with regard to employment, real GDP and inflation.
9. To discuss the short- and long-term effects on interest rates, inflation rates, and output growth from overly expansionary monetary policy in the late 1970s and Volcker's fight against inflation from 1979-1982.
10. To analyze monetary policy according to Taylor's rule with reference to the interest rate targeting of the 1970s, 1990s and 2000s and the resulting boom and bust cycle.
11. To analyze the effects on economic activity and economic growth from fiscal policy and deficit spending with reference to the non-sustainability of current policy.
12. To analyze the effect of the 1980s budget deficits and monetary policy on real interest rates, the current account deficit, the value of the dollar, and the US as creditor or debtor nations.
13. To analyze the adjustment process of the Bretton Woods international financial system and to use the analysis to explain why fixed exchange rates are non-sustainable.
14. To analyze the role of fixed exchange rates in the creation of the boom and bust cycle with regard to the Asian currency crisis in 1997/98.

REQUIREMENTS and GRADES

There will be two mid-terms (30% each) and a final exam (40%). Tentative dates are February 13/14 and March 27/28. The final exam (40%) is May 1/2. No make-up tests are given. The weight of a missed test (assuming a valid excuse) will be added to the final exam. Otherwise the missed test grade is zero. Incompletes are not an option. The grading scale is:

A/A-: 90 – 100% B+/B/B-: 80 – 89% C+/C: 70 – 79% F: Less than 70%

EXTRA CREDIT

No extra credit is provided at the end of the course. Rather there are opportunities to bolster your grade with special extra credit assignments during the semester. Points can be earned that are added to your cumulative grades for a 1000 point total (see example below). The first opportunity (see the end of this syllabus) is the special assignment due the first day.

EXAMPLE OF GRADE CALCULATION

Final grade is based on a 1,000 point total with Exam I counting 300 points (3 X score), Exam II counting 300 points (3 X score) and the Final Exam counting 400 points (4 X score). The extra credit points are added to the final Exam calculation. EXAMPLE: Exam I grade is 79, Exam II is 89 and Final is 87. Total points would be 852 out of 1,000. With 48 points of extra credit (out of a possible 50) the final score would be 900 for an "A", despite not making an A on any one of the exams.

ADDED REQUESTS and REQUIREMENTS

You must put your name and your course numbers (MBA 703) on every assignment submitted for a grade. Please print and staple so the paper can be returned with comments.

MISSION STATEMENT of BRYAN SCHOOL of BUSINESS and ECONOMICS

In the Bryan School of Business and Economics, we create and disseminate knowledge about the theory and practice of business. In addition to our courses and research, we accomplish this through hands-on projects, global experiences and outreach to the community. Our work produces principled leaders and exceptional problem solvers who have a global perspective, an innovative mindset, a broad understanding of sustainability, and a commitment to improve the organizations in which you work and the communities in which you live.

COURSE OUTLINE: MBA 703 SPRING 2018

Class 1: Introduction - Economic Growth and Development

Read Chapter 9 Section 4: (Chapter 9.4) To be read with the Rosling assignment

Ch 1: The Economic Way of Thinking

Ch 2: Globalization (Section 19.1) of the Circular Flow Model of Economic Activity

Ch 3: PPF - Trade and Growth

EXTRA CREDIT Opportunity 1: Assignment for the 1st Class (last two pages of this document) is due January 9/10. Maximum value is 10 points.

Class 2: Supply and Demand

Ch 4.1 Demand: Fig 4.1 and 4.2

Ch 4.2 Supply: Fig 4.3 and 4.4

Ch 4.3 Market Equilibrium and the Automatic Adjustment Process Fig 4.5 and 4.6

Factors that Shift the Supply and Demand Fig 4.7 and 4.8

Shifts in the Curve (Schedule) and Movements along the Schedule

Double Shifts Figure in Supply and Demand: Fig 4.9 and 4.10

Ch 4.4 Price Rigidities: Floors e.g. Minimum Wage: Fig 4.11 and 4.12

Price Ceilings Fig 4.13 and 4.14

Sticky Wages and Prices or Rigid Wages in the Short-run, p. 107

Class 3: Measuring GDP

Ch 5.1 Income and Expenditure Approaches

Ch 5.2 Real GDP

Define GDP by the four categories of expenditures. (Know their abbreviations)

What spending is not included in GDP? How is inventory treated in the measurement of GDP?

Exercise: Calculating nominal real GDP, actual GDP and the price level

Exercise: Draw a time series diagram of nominal and real GDP for the 1990-2014 period,

Ch 5.3 The Business Cycle: Potential and Actual Real GDP

Exercise: Calculate Potential GDP and the Output Gap in a Time Series Diagram

Exercise: Go to the NBER website: <http://www.nber.org/cycles.html>

Analyze the data. What do you discover?

Class 4: Jobs, Labor market and Unemployment

Ch 6.1 Labor Market Indicators: Definitions and Formula

Ch 6.2 U Rate, LFPR, and Alternative Labor Market Measures

Ch 6.3 Unemployment and Full Employment, Types, GDP and Output Gap

Ch 8.1 More on Potential Real GDP

Ch 8.2 Natural Rate of Unemployment and Potential GDP

EXTRA CREDIT Opportunity 2: Provide an analysis of the current conditions in your country's labor market. Your analysis should include a number of different unemployment and employment measures. What are the important trends? If your country does not have enough data to make the assignment interesting, use the US as the default. Data that could be of interest is the labor force participation rate, employment to population rate, number of multiple jobholders, unemployment duration, job loser and leavers, entrant and reentrants to the labor force, and various measures of unemployment the quality of jobs, the average wage rates etc. The paper is due at the beginning of class February 6/7. Maximum value is 10 points.

Class 5: pp. 190 -191 Schools of Thought and Public Policy

Chapter 13.1: Aggregate Supply

Chapter 13.2: Aggregate Demand

Ch 8.1 More on Potential GDP

Ch 8.2 More on The Natural Rate of Unemployment (Sticky or Rigid Wages)

Overflow & Review for Exam

Class 6: **TEST I**

The CPI and the Cost of Living

Ch 7.1 The CPI

Ch 7.2 The CPI and Other Price Level Measures

Ch 7.3 Nominal and Real Values (The Labor Market in Ch 8 uses real wages.)

Class 7: Economic Growth.

Ch 9.1 Growth Rates and the Rule of 70

Ch 9.2 Labor Productivity Growth

Capital Accumulation and Diminishing Returns

Expansion of Human Capital and the Discovery of New Technology

Ch 9.3 Growth Theories

Ch 9.4 Achieving Faster Growth: Preconditions and Policies

Class 8: Finance, Savings and Investment

10.1 Financial Institutions and Markets

10.2 The Loanable Funds Market

10.3 Government in the Loanable Funds Market

Explain how the deterioration in balance sheets of financial institutions and the simultaneous failures of these institutions cause a decline in economic activity.

Class 9: The Monetary System

11.1 What is Money?

11.2 The Banking System

11.3 The Federal Reserve System

11.4 Regulating the Quantity of Money

The role of the Fed and the fractional reserve banking system in the creation and destruction of money through the open market purchase or sale of government bonds is demonstrated. The Expansionary case is introduced as is the contractionary case. The money multiplier is introduced and the influence that the public and the banking system can have on the multiplier is discussed through the history of the Great Depression.

Money, Interest and Inflation

12.1 Money and the Interest Rate

12.2 Money, the Price Level and Inflation

12.3 The Cost of Inflation

The Loanable Funds and the Credit Market – the role of inflationary expectations

EXTRA CREDIT Opportunity 3: What has been Paul Volcker's contribution to macroeconomic history? What were the important policy changes that were enacted under his leadership? What was the effect on the economy? Write a 400-600 word response to these questions. The paper is due at the beginning of class on March 20/21. Maximum value is 10 points.

Class 10: Monetary Policy

17.1 How the Fed Conducts Monetary Policy:

17.2 Monetary Policy Transmission

The Fed Fights Recession (pp. 436-437)

The Fed Fights Inflation (pp. 438-439)

P. 428 – The Taylor Rule

Exercise: Use the Taylor Rule to calculate the Federal Funds Rate. Should the Federal Reserve have a policy rule?

Class 11: **TEST II**

Ch.17.3 Alternative Monetary Policy Strategies – The Role of the Fed.

Ch 13.1 Aggregate Supply

Ch 13.2 Aggregate Demand

Ch 13.3 Explaining Economic Trends and Fluctuations (Revisiting the Business Cycle – Class 3)

Class 12: Fiscal Policy

Ch 16.1 Federal Budget: Deficits and the Time Bomb

Ch 16.2 Fiscal Stimulus

Ch 16.3 The Supply Side - Potential GDP - and Growth

Exercise: Diagram and explain “Crowding Out I” and “Crowding Out II”

EXTRA CREDIT Opportunity 4: Summarize from your research on the various causes of the Great Depression. Please footnote your source material. The paper should be 400-600 words long is due at the beginning of class on April 10/11 . Maximum value is 10 points.

Class 13: International Finance

19.1 The Exchange Rate

19.2 Monetary Policy and the Exchange Rate

The International Financial System over Last Century: Booms and Busts

What policies Are Sustainable?

EXTRA CREDIT Opportunity 5: Write a 400-600 word analysis of the causes and consequences of the 2008 Global Financial Crisis. Please footnote your source material. The paper is due at the beginning of class on April 24/25 . Maximum value is 10 points.

Class 14: Relative Value Models to value Financial Markets:

- Fed Model (compares earnings yield to yield on government securities)
- Yardeni Model (adds yield on risky debt to Fed model)
- P/10-year MA (controls for inflation and business cycle effects)
- Tobin's q (an economic theory about the relationship of security prices and asset replacement costs)

Class 15: Review

Comprehensive Final on May 1st for Tuesday class; May 2nd for Wednesday class.

MBA 703: Economic Policies & Impact on Global Outcomes

ASSIGNMENT for the first class – Economic Growth and Development

The assignment for the first class (January 9 or 10) is to choose, analyze and present some of the vast economic, social, education, and health data found at the GAPMINDER Web site for several different countries. You are responsible for your home country, plus the United States plus one other Asian country of your choice and one European country of your choice. US students will choose one Asian, one European and one African country in addition to the USA.

Read Chapter 9.4 in the textbook to gain some background regarding economic growth and development. Listen to several of the Hans Rosling videos found on the TED web site. Go to the Gapminder web site and choose some data that may pertain to economic growth and development. Present the data in graphical form. For example, place Income per person on the vertical axis and chose some data for the horizontal axis which could include the Corruption Perception Index, the math achievement of its 4th grade student, malnutrition, child survival rate, employment rates, etc. There are many more other possibilities. Show the movement of the country over time given the availability of the data.

You also should conduct a brief political/historic/economic analysis for your home country over the last century. You should investigate factors that contributed or retarded economic growth and development. What is the level of rent-seeking behavior in your country? What about crony capitalism? This part of the analysis should only be done for your home country. This is an open-ended assignment so there is no right answer.

Questions you should address include: What is the role of government and markets in the economic system in 1916? Has it changed over the past 100 years? What is the level of economic freedom and respect for property rights? How much corruption is in the country? What is the level of protection of domestic industry by policy and tariffs? How developed is the country's education system with regard to literacy of men and women? How have the life expectancy and the level of health changed? Did the Great Depression and World War II have a profound effect on your country? Did your country suffer from a revolution or a military coup that changed the economic allocation of scarce resources? Or has there been a shift in the political/economic system? Did your country have a hyperinflation episode? What happened and why? Not all of these questions will be necessarily pertinent for your country. You will want to develop your own additional list of issues and questions. You may want to think about a time line of events and changes that provide some insight into the "preconditions for growth" (see the textbook Ch. 9.4), policies, and other factors that influence growth.

Rosling

Start at www.gapminder.org/videos/200-years: **a four minute introduction into Rosling.**

The following is a list of his video presentation which is found by Googling Rosling TED Talks

TED 2006 [The best stats you've ever seen](#) 8.3M views Jun 2006, 19:50

TED 2007 [New insights on poverty](#) 2.6M views Jun 2007, 18:57

[The magic washing machine](#) 1.8M views Mar 2011, 9:15 [13:20](#)

Why you should listen? Even the most worldly and well-traveled among us will have their perspectives shifted by Hans Rosling. A professor of global health at Sweden's [Karolinska Institute](#), his current work focuses on **dispelling common myths about the so-called developing world**, which (he points out) is no longer worlds away from the West. In fact, most of the Third World is on the same trajectory toward health and prosperity, and many countries are moving twice as fast as the west did.

What sets Rosling apart isn't just his apt observations of broad social and economic trends, but the stunning way he presents them. Guaranteed: **You've never seen data presented like this.** By any logic, a presentation that tracks global health and poverty trends should be, in a word: boring. But in Rosling's hands, data sings. Trends come to life. And the big –usually hazy at best– snaps into sharp focus. Rosling developed the breakthrough software behind his visualizations through his nonprofit [Gapminder](#).

Rosling's presentations are grounded in solid statistics (often drawn from United Nations data), illustrated by the visualization software he developed. The animations transform development statistics into **moving bubbles and flowing curves that make global trends clear, intuitive and even playful.** During his legendary presentations, Rosling takes this one step farther, narrating the animations with a sportscaster's flair.

Rosling began his wide-ranging career as a physician, spending many years in rural Africa tracking a rare paralytic disease (which he named konzo) and discovering its cause: hunger and badly processed cassava. **He co-founded Médecins sans Frontières (Doctors without Borders) Sweden**, wrote a textbook on global health, and as a professor at the Karolinska Institut in Stockholm initiated key international research collaborations.
