Instructor: Dr. Larry Taube
Office Hours: Mondays Noon-2, and by appointment and email
E-mail: lritaube@uncg.edu

PREREQUISITES: Any 2 of these courses: SCM206, SCM302 and/or SCM402; ISSC major
CREDITS: 3 credit hours

FOR WHOM PLANNED: ISSC Students and other students interested in SCM.

CATALOG DESCRIPTION: Overview of strategic cost management and procurement in the supply chain; tactics in effective management of procurement; management of total supply chain costs; hands-on supply chain management project(s).

COURSE CONCEPT/VISION: This course will use concepts from procurement, supply chain management, corporate finance and managerial accounting to analyze supply chain costs and supply chain strategies and make effective supply chain and procurement decisions. It is preferable that you have knowledge of accounting and financial concepts for this course. If you do not have a finance or accounting background, I recommend that you take the time and read any textbook that caters toward a financial perspective for decision making. A good book I’ve read is titled “Finance for Non-Financial Managers” by Gene Siciliano. It is catered to those who do not have a finance or accounting background and it is a very easy read. You can buy this book on Amazon.com (about $12 new and $7 used).

I will also post additional YouTube videos that will be listed as “Extras” on particular subjects to facilitate your learning. These videos will give you additional information on the particular subjects covered in class. While these videos are “Extras”, I believe they will be very helpful if you need more training on a particular financial or supply chain concept. If you plan on taking an ISM certification exam, view these “Extras” in areas that you may be weak for an exam!

Speaking of ISM, this professional group is a primary educational group for supply managers, serving similar roles that correspond to APICS’ roles for operations managers. If you are a “full time” student, you can join both professional groups for free; please email me with questions! This course is organized around the first exam of ISM’s three exam Certification! The first exam has the following components: Introduction to Purchasing and Supply Management, Sourcing Process, International Sourcing, Supplier Relationship Management, Ethics and Social Responsibility, Costs and Finance, and Contracts/Negotiations. Please note the next paragraph!
**Hence, this course is broken into five phases:**

1. **The Procurement Phase** – This four week phase will cover key procurement concepts and case studies of related procurement issues. After the procurement phase, students will have a better understanding of how to apply procurement concepts to strategic issues within an organization and the supply chain.

2. **The Sourcing Process and Supplier Relationship Management** – This two week phase focuses on managing supplier recruitment and relationships. Students will learn how to select a supplier or vendor, and how to maintain a supplier relationship.

3. **ISM (Supply Management) Team Case** – Supply Chain managers need to be able to work in a team environment, and virtual teams are becoming more and more prevalent! Students will analyze a case, interact with each other and a Supply Chain Consultant, and produce a virtual case presentation.

4. **Legal and Ethical Issues Phase** – This one week phase will explore social responsibility and legal contracts. Students will understand the legal aspects of a contract.

5. **The Strategic Costs and Design Phase** – This six week phase will review key costing and finance concepts and their application to supply chain strategies and procurement. Students will participate in the Cool Connection simulation, and make decisions in Finance, Sales, Operations and Logistics, and build a solid understanding of the links between corporate strategy, supply chain strategy, cost accounting and finance and how these concepts work together to better manage the supply chain and make strategic decisions for the organization.

**STUDENT LEARNING OUTCOMES:** On completion of this course, students will be able to:

1. Understand how the supply chain contributes to corporate strategy and value.
2. Examine the importance of cost trade-offs, procurement, production planning, inventory policy, logistics, and distribution in the formulation of supply chain strategy.
3. Justify and apply Activity-Based Costing/Activity Based Management (ABC/ABM) and Total Cost of Ownership (TCO) in formulating procurement and supply chain strategies.
4. Identify negotiation frameworks and planning, and the use of cost and price data in conducting effective negotiations and in the writing of a procurement contract.
5. Apply concepts in the execution of the competitive bidding process (including requests for inquiry, requests for quotation, requests for proposal, and statements of work).
6. Identify and apply contract laws in writing procurement contracts, settling supply chain issues, avoiding disputes and managing suppliers (vendors).
7. Introduce and evaluate the use of technology in procurement and the overall supply chain, and how technology can assist in controlling and reducing supply chain costs.
8. Analyze buyer-supplier relationships and vendor management and their impact on achieving procurement and supply chain cost goals.
9. Examine how to apply risk management concepts in creating a more agile, cost-effective and responsive supply chain.

TEACHING STRATEGIES: This course will be a combination of textbook, web-delivered content, readings, individual and group work and electronic discussions.

This course is a collection of excellent resources, some of which are created by Dr. Taube, and others have been created by other faculty members and from the YouTube community! And some of which are superior cases that SCM professionals use in their own education! Dr. Taube has no problem using outstanding materials from other outstanding instructors/creators to improve your learning, and NEITHER should YOU! Dr. Taube will also host weekly WebEx sessions on Thursday from 7 to 8pm as long as there is sufficient demand. Once online participation dwindles to one or two participants, personal email contact will replace the weekly WebEx as Dr. Taube interacts one on one with students and their questions!

EVALUATION DELIVERABLES/METHODS:

<table>
<thead>
<tr>
<th>Deliverable</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Canvas Thread Discussions (7@50)</td>
<td>350</td>
</tr>
<tr>
<td>2. Short Cases (8 cases)</td>
<td>900</td>
</tr>
<tr>
<td>3. Cool Connection Simulation</td>
<td>750</td>
</tr>
<tr>
<td>4. Procurement Phase Exam</td>
<td>500</td>
</tr>
<tr>
<td>5. Course Project</td>
<td>500</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>3000</strong></td>
</tr>
</tbody>
</table>

GRADING (Letter grades): A (93% and more of 3000 total points); A- (90% to 92.9%); B+ (87% to 89.9%); B (83% to 86.9%); B- (80% to 82.9%); C+ (77% to 79.9%); C (73% to 76.9%); C- (70% to 72.9%); D+ (67% to 69.9%); D (64% to 66.9%); F (Below 64%)

Average expected turn-around time for all assignments is TWO weeks.

INSTRUCTOR AVAILABILITY: I am available via e-mail (lhtaube@uncg.edu) and by office phone (336-334-4987) to answer questions as well as give guidance and feedback. I would prefer you contact me via e-mail first, then by phone.

I check my e-mail and Canvas each day and I usually get back with students within 12 minutes to 12 hours. If you need to schedule an appointment to meet me on campus, just e-mail or call me at my office phone and I will schedule a time that is convenient for both of us.

WEEKLY INFORMATION SESSIONS: I will have weekly Information Sessions on Thursdays from 7pm to 8pm. We will have this time to go into more in-depth study of the material and to answer any questions. You will need to purchase an internet headset or have other audio with the ability to speak in order to be an active participant in the WebEx sessions and any recorded sessions. The instructor will record all information sessions in WebEx for later reference and use, in case you are unable to attend the posted times.
Prior to the ISM Case, students will be broken out into groups of four to conduct group work, so the use of WebEx will be necessary. The Cool Connection will also involve extensive teamwork. Please ensure that you have audio headsets and/or other audio means to participate in the group work and negotiations.

REQUIRED TEXTS/SOFTWARE/READINGS/REFERENCES:
One required textbook for the class: Custom Text, Strategic Cost, Design, Procurement, and Contracts, SCM 432/652, Book Two, Nemiah E. Bryant (ISBN 13-978-1-121-66446-3). The book is available at the UNCG Bookstore. Please contact them to buy and send the textbook if needed. Additional readings will be posted to Canvas in the “Course Documents” section. There will a portion of assignments in this course where students will use Collaboration software in Canvas to work in groups.

One required software for the class: Students will work in WebEx and Canvas to prepare documents together in writing reports and to make decisions for Cool Connection, a Supply Chain Management and Finance Software package. The software package will be purchased through the publisher midway through the semester; its cost is approximately $50.

Other software and sources: UNCG Canvas. Supplemental readings and other materials relevant to this course are accessible through UNCG’s Canvas online course management software. You must have an active UNCG email account to access Canvas. Canvas works best using the Mozilla Firefox browser. Internet Explorer should work for Canvas but it is better supported by Mozilla. Current news media; it is important that you keep abreast of current events that are relevant to the course subject matter and attempt to relate them to course materials.

ACADEMIC HONOR CODE: Each student is required to adhere and sign the Academic Integrity Policy on all work submitted for the course. Please refer to UNCG Graduate Bulletin for any questions. Students are expected to do their own work for individual assignments during the all course phases, and collaborate on group work throughout the course.

STUDENT RESPONSIBILITIES:
1. The student is expected to stay current with class assignments and actively participate in all group work. Failure to participate will result in a lowering of a student’s grade. SCM 432 contains a lot of reading from the textbook and articles, so it is very important that students keep up with reading assignments and articles in order to perform well on the threads and written assignments.
2. Students are expected to provide information on assignments and threads based upon informed synthesis of reading material (assigned as well as other retrieved information by the students from relevant publications).

EXPECTATIONS OF ONLINE COURSES:
Online courses are different than classroom courses; students should expect these differences. Some students prefer the online format; others prefer classroom format. Experience suggests there are pros and cons to each format:
• Some students believe that online courses require more time and effort than classroom courses.
• Some students miss the greater instructor interaction made possible by classroom courses.
• In general, online courses require a higher degree of self discipline and motivation on the student’s part than do classroom courses. Online courses depend more directly on the student’s ability to read and learn from textbooks, articles and written materials.
• Because the course content is not limited to a given time and place, the student can study at a time and place that is convenient for them.
• The interaction found in a classroom is replaced, in an online course, by threaded postings to a discussion board. Some students enjoy this medium; others do not. However good the discussion in a discussion forum, it is different than the give-and-take of a classroom discussion.

In summary, students should be prepared for the online course’s attributes and do their best to take advantage of the strengths of this format. If you value more interaction with the professor and/or your fellow students, seek out ways to do that. Dr. Taube’s virtual door is always open!!

COURSE GRADING METHODOLOGY

1. **Participation Grades.** The Canvas discussion forums – one for the introduction / welcome and for certain modules in the course – will be used to host student participation. Each week, students are expected to: 1) read the appropriate chapter in the text; 2) review the online content; 3) read the assigned readings, and then 4) contribute to the discussion forums. Students must contribute to his/her assigned thread question by the due date at the end of the day. At the end of each thread assignment, the instructor will evaluate each student’s contributions and assign a participation grade in the Canvas grade center. Seven participation grades – one for each discussion forum in Modules 1-6 and 8 – will be scored. Students will be evaluated using the following criteria:
   a. **Volume of Posts** – Each student must submit his/her assigned post question and comment on someone else’s post for that Module. I will post a list of assigned question numbers before the first week of class in the Introduction to SCM652 Module. Your comment on someone else’s post must be at least eight sentences.
   b. **Level of analysis/argumentation.** You must present a thoughtful argument and interpretation, not a mere summary of facts. (Note: it does not matter which side of an issue you argue, only how well or how poorly you make the argument.)
   c. **Use of evidence.** The material you select to support your thesis must be relevant and must clearly back up your argument. Actual company examples are great!
   d. **Clarity of communication.** You must present the evidence and express your argument in a clear, comprehensible manner.
   e. **Timing of posts.** Students are expected to contribute to the threads throughout the thread period. Late posts (near the deadline) will not count as favorably as early posts (occurring earlier in the thread period), since more commentary is available to the late poster. It is more difficult to post early, when there are fewer posts to
respond to and more original thinking is required; so in general, early posts will be scored higher.

f. **Article citations** – Posts containing citations (urls) of articles relevant to the subject matter will score higher than posts not containing citations. Your post must explain the significance of the article to the subject matter and citations must relate directly to the assigned question. Citations with no explanations, or citing previously-cited articles, will not add to your score. While students can use citations used by other students, the relationship of the citation to the assigned question must be clear and concise.

g. **Personal experiences** related to relevant subject matter can be very useful. However, personal opinions that are off-topic, or not supported by evidence or personal experience are of limited value and will be graded accordingly.

**Discussion Forum Posting Tips**

- Post early (in the week) and often.
- When finished writing your post, **be sure to hit “Submit” NOT “Save”**. “Save” will make it available to you later, but it hides your post from all other students so it is not eligible for grading credit.
- Use the Course Feedback forum to provide feedback on the course – what you like, what you don’t, suggestions for improvement, etc. You may post anonymously or self-identify, whichever you prefer. The instructor reads these posts and has in the past modified courses to incorporate good suggestions. Your suggestions will improve the quality of this course and future ones.

2. **Short Cases** – Short Cases will be a part of assignments given throughout the course. Students will be expected to master the concepts in the articles and books, and apply the information from the readings and class participation to the cases and problems. Student will individually complete Short Cases and one exam during the Procurement Phase, and the ISM Case and Cool Connection activities will be done as a group. The syllabus and Canvas will indicate when assignments are due, and which assignments are done individually or as a group. Groups of four students will be created early in the semester.

3. **Exam.** One Exam will be administered through Canvas. The exam will consist of multiple choice and essay questions that test the student’s knowledge of course content. The Exam will focus on the Procurement Phase of the course, and learning objectives from that four module period, including assigned reading and case assignments. Exams will be timed, and you will NOT have time to “look up” multiple choice questions!

4. **Cool Collection Simulation** – This will be done as a group project and done in the last six weeks of SCM432. A group of four students will be assigned roles of Supply VP,
Sales VP, Purchasing VP, and Finance VP. Each team will make six rounds of decisions. The grade on the simulation will consist of how well the team response to the market, as well as organization, clarity, completeness, responsiveness and content.

5. **Course Project** – Students will have several options for ONE course project, including:
   a. APICS Certification Workshop and Exam. Many companies value the APICS CPIM certification, and we will be hosting two here in the Bryan School. Some students don’t value this, so don’t select this option! The Basics of Supply Chain Management (BSCM) is a Survey of Operations Management topics, similar to SCM302 and SCM402 and/or SCM650 and/or MBA708. Dates TBD!! There is a charge for the Workshop, and a separate charge for taking the exam. See [http://www.triadapics.org](http://www.triadapics.org) for more details!

   b. Report on a Supply Chain Internship. If you are in a Supply Chain internship, you could write an application paper or case study about your supply chain responsibilities for the firm. This paper would have to go beyond your job/internship responsibilities. Please contact Dr. Taube, informing him of your job, responsibilities, and ideas you may have for the paper topic.

   c. Research paper; contact Dr. Taube for more details.

   d. Team Presentation at ISM Case Competition, UNCC on March 1&2. This is the fourth year of the case competition, and the first year one of our students won a $1000 scholarship (see [http://ure.uncg.edu/prod/cweekly/2015/07/21/uncg-and-nc-at-students-sc3/](http://ure.uncg.edu/prod/cweekly/2015/07/21/uncg-and-nc-at-students-sc3/)). The ISSCM department will pick up some of the travel costs for the top team from SCM432. Our Module 7 features the same case that was used in a prior year, and we will have a Supply Chain Consultant available for questions from the various teams. These same teams will also be used for the Cool Connection simulation. For more information about ISM and their Case Competition, see [https://www.ism-cv.org/insidepages/members.cfm](https://www.ism-cv.org/insidepages/members.cfm). Also see their Career Center: [https://mail.google.com/mail/u/0/#inbox/151b70f0eb360937](https://mail.google.com/mail/u/0/#inbox/151b70f0eb360937).

   e. New option for Spring 2019! Students can elect to undertake four SAP Modules! We have just acquired SAP for our department, and you may decide to work through these modules on Materials Management, Warehouse Management, and Sales and Distribution. Please let Dr. Taube know if you are interested!

   f. Other ideas for a Course Project that you may have. As you can see, we are pretty flexible about this Course Project. What ideas do you have that you feel would be useful for your learning experiences and for your career path? Contact Dr. Taube!

   g. We will have some actual projects from UNCG’s Purchasing Department and from local firms. Some of these may be small team projects, and others may be
one person teams. You would have to interact with various individuals from various departments to satisfy the requirements of the projects. Please let Dr. Taube know if you are interested in these types of Course Projects!!!
## COURSE SCHEDULE (See Calendar for all Assignment Due Dates!!)

Guidelines for Ethical and Professional Behavior of Students and Faculty

Preamble: Our Commitment

The administration, faculty, staff, and students of the Bryan School of Business and Economics at UNCG are committed to ethical and professional behavior in all areas of their academic and professional lives. The values, principles and expectations established in this document and the addendums encompass many aspects of professional behavior and integrity. It is not an exhaustive list, since change is part of life both inside and outside the university.

It is further noted that all expectations and principles discussed in this document apply to all modes of communication/course delivery. This set of Guidelines constitutes a statement of values, principles, and expectations; concerns and issues are still best addressed by conversations between the individual faculty member and student. If further discussions are necessary, Department Heads may be contacted by either faculty or students.

Core Values: Underpinning Guidelines

The first two sentences of the UNCG Student Code of Conduct are: “Members of the UNCG community embrace fundamental principles to ensure a campus environment conducive to peaceful and productive living and study. These principles include five values: honesty, trust, fairness, respect, and responsibility.” All university members (students, faculty, and staff) have a responsibility to uphold these five values and this is true in the Bryan community as well.
Expectations of Students
Students in the Bryan School must conform to all existing principles found in UNCG’s Student Code of Conduct and the Academic Integrity Policy. Further details may be found at the following sites:
http://sa.uncg.edu/dean/code/ and http://sa.uncg.edu/dean/academic-integrity/

The attached addendum lists specific expectations of students regarding the learning process and environment at the Bryan School.

Expectations of Faculty
Faculty in the Bryan School must conform to all existing UNCG codes and policies (see http://provost.uncg.edu/publications/policyindex.asp for the current list of university policies).

The attached addendum lists specific expectations of faculty regarding the learning process and environment at the Bryan School; faculty teaching roles are of particular relevance to these Guidelines.

Following the redesign of our website, here is the updated link for the two addendums mentioned on this page for the Bryan School's 'Guidelines for Ethical and Professional Behavior of Students and Faculty'.

Footnote 1: This document does not constitute a binding contract between students and the University.

Footnote 2: Portions of these Guidelines were modeled after the Professional Standards developed by the College of Business at Illinois State University. We thank them for their contributions!
